

80 Series Balances

5/8" PLASTIC TUBE BALANCE

Tube diameter 9/16" but considered 5/8" in the trade.

NOTE: In most cases, the 72 series balances can be used as a direct substitute. Consult your account representative.

Ordering Information

1. Measure length of the plastic tube.
2. Select corresponding part number from the chart.
3. Identify which carrier or shoe to be attached as well as accessories needed with your balance.

Note: Carriers and accessories must be ordered separately.

General Information

1. In the past, various bearing (or pawl) colors were used to indicate different weight ranges for these balances. The colors used were white, red, blue, black and yellow. Currently the standard color for sashes weighing up to 30 lbs. is red and for 30 to 40 lbs, sash is yellow. If your sash weighs between 30 and up to 40 lbs., please specify HD after the part number. Example: If ordering a 22" extended rod balance with an 80-500 foot attached and your sash weighs 30 to 40 lbs., your part # is 80-22P-1HD.
2. Gray tubes are standard. All other colors must be special order.

For 80-500 Attached

Rod length is 1-3/4" longer than tube.

Tube Length	Part Number
16"	80-16P-1
18"	80-18P-1
20"	80-20P-1
22"	80-22P-1
23"	80-23P-1
24"	80-24P-1
25"	80-25P-1
26"	80-26P-1
27"	80-27P-1
28"	80-28P-1
29"	80-29P-1
30"	80-30P-1
32"	80-32P-1
34"	80-34P-1
36"	80-36P-1

For 70-523 Attached

Rod length is 3/4" longer than tube.

Tube Length	Part Number
16"	80-S16P-1
18"	80-S18P-1
